

NuLids

Finally... an all-natural, one minute per day at-home treatment for dry eye disease that really works!

NuLids – It's so easy you can do it with your eyes closed!

NuSight Medical is advancing the way doctors manage their dry eye patients.

NuSight Medical Value Proposition

NuSight Medical is an innovative medical device company that provides doctor recommended, at-home treatment solutions for dry eye disease (DED) that are safe, effective, and easy-to-use for patients, while simultaneously improving practice workflow, efficiency, and income for eyecare providers

Product Statement

The NuLids System is an innovative doctor recommended, at-home treatment for patients with Dry Eye Disease (DED) that effectively alleviates symptoms by stimulating and rejuvenating the meibomian glands back to a healthy state. Studies demonstrated a 65% improvement in tear film breakup time (TBUT) and an 81% increase in Meibomian Glands Yielding Liquid Secretions in less than 30 days with NuLids.¹ Additionally, NuLids has been shown to remove scurf, improve Meibomian Gland effectiveness, and increase Meibomian Gland output by 2 times.¹

Safe and Easy to Use

NuLids is safe, easy to use, and clinically effective. With daily use, patients report a noticeable difference in both signs and symptoms of dry eye in as little as eight days. NuLids also provides real cost savings for patients, as many NuLids patients report a significant reduction or elimination in their use of other treatments such as lid scrubs, artificial tears, gels, ointments, warming masks, anti-inflammatories, and other treatments.

In addition to DED, NuLids is indicated for use with the following: Blepharitis, Demodex, or when the lid margins show evidence of thickening, cylindrical dandruff, meibomian stasis, ectasia, scaling, skurf, or when the lids become scalloped, rolled, or hyperemic. NuLids is typically prescribed with a lubricating gel, a cleanser such as hypochlorous acid for Blepharitis, or tea tree oil when Demodex is present.

Provides Practice Efficiency and Profitability

Incorporating the NuLids System into your dry eye regimen creates a new revenue stream for your practice without impacting overhead costs. Due to its clinical effectiveness and ease of use, your patients will be more satisfied, leading to increased patient retention and new patient referrals. NuLids can also be used in conjunction with in-office treatments, providing a continuum of care that will help minimize symptoms between office visits. NuLids improves patients' lives and increases practice revenue.
